Carrier's Efficient Fan Coils

Efficiency

Carrier fan coils are designed to improve the airflow in your home and provide comfortable heating and cooling when you need it most. Matching your system with the proper Carrier fan coil will also enhance the heat transferring process so you can enjoy maximum comfort and energy savings.

- Designed-in parts help to maximize efficiency while minimizing your utility costs.
- The grooved copper tubing and aluminum fins help improve heat transfer and increase energy efficiency.
- Model FH4 includes a permanent washable filter that can be cleaned and reinstalled for economic air filtration.

Things to Consider Before You Buy

Puron® Refrigerant

Puron refrigerant is environmentally sound and won't deplete the ozone layer. Carrier introduced Puron refrigerant a full six years ahead of the competition, paving the way for the future. The Clean Air Act of 1990 prohibits the production of HCFC-based air conditioners and heat pumps by 2010, and bans Freon®-22* production by 2020. As Freon production reduces, its cost may increase. Freon®-12 in the automotive

industry increased by a whopping 800% in a short seven years following its phase-out! Ensure your cooling costs by investing in systems with Puron refrigerant – environmentally sound, efficient and dependable refrigerant designed for the future. The Carrier® FY5 and FF1ENP fan coils allow you to maximize your system's efficiency while making an environmentally sound choice.

Comfort

Carrier specializes in creating a customized home comfort system tailored to your needs with our broad selection of residential heating and cooling products. Your Carrier dealer can help you choose the best system for your home, including Carrier-exclusive features that further enhance your indoor environment.

- Models FY5 and FH4 are available in a pre-painted cabinet for upflow, downflow and horizontal applications.
- FF1 is specifically designed for apartment applications – its small size allows it to fit perfectly in tight spaces like a closet.
- The unique blower design improves airflow for greater comfort and reduces vibrations for quieter operation.
- These fan coils are the smart choice for homeowners who appreciate the comfort, reliability and overall value of Carrier products.

ArmorCoat™ Protection

Premature indoor coil corrosion affects many home comfort systems. To combat this potential problem, Carrier offers optional ArmorCoat protection. ArmorCoat provides a tin plating of the indoor coil's copper hairpins. This creates a barrier between the corrosion-causing elements and the coil. Turn to experts at Carrier for all your home comfort needs.

Technology

Puron® refrigerant – environmentally sound, replacing Freon®-22* and won't deplete the ozone layer.

- 1 Foil-faced insulation** – helps isolate sound, reduces bacterial growth and features an easy-to-clean surface.
- 2 Airtight cabinets** – keep air inside and help direct it within your ductwork for greater efficiency.
- 3 Enhanced drain pan design** – allows complete drainage to improve indoor air quality.
- 4 Electric resistance heaters** – maintain heat consistency during extremely cold temperatures.
- 5 ArmorCoat™** – optional coil corrosion protection available on certain models.

Model FY5 Fan Coil

Limited Warranty

To the original owner, the Carrier® FY5, FF1 and FH4 fan coils are covered by a 10-year parts, excluding the coil, limited warranty upon timely registration of your new equipment.* The copper coil is covered by a five-year parts limited warranty. Ask your Carrier dealer about optional extended warranties, which may include labor.*

*Warranty period on parts is five years if not registered within 90 days. Jurisdictions where warranty benefits cannot be conditioned on registration will automatically receive a 10-year parts limited warranty. See warranty certificate at carrier.com for complete details.

* Freon is a registered trademark of E.I. DuPont de Nemours & Co.

Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier® systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
