

Heat Pumps ~ Fan Coils

Right for You

How can we say that Payne knows what's right for you? The answer is experience. D.W. Payne and sons started making the right products for their west coast customers back in 1914. Since that time, we've expanded nationwide with a brand that provides attractive, affordable products that work. These same principles apply to our family of heat pumps and fan coils. Because this solid lineup of comfort equipment carries the Payne name, you can be sure it's the right product at the right price.

Comfort All Year Long

Payne understands the decisions involved in choosing a new heating and cooling system. Select a good one and you are a hero. Make a bad choice and live with it for years. That's why we take pride in offering a complete line of effective, efficient and affordable heat pumps. No matter which Payne system you choose, you can be confident that you'll be comfortable every season for years to come.

The most popular unit in our lineup is the PH13NR. Pleasantly attractive and designed to last, this is one smooth-running, energy-saving heating and cooling machine.

Even the busiest people need to slow down and enjoy a quiet moment in the comfort of their home. From the hottest day of summer to the snowiest winter evening, the PH13NR delivers the comfort of economical operation with 13 SEER (Seasonal Energy Efficiency Ratio) cooling and 7.7 HSPF (Heating Seasonal Performance Factor) heating efficiency. Just like gas mileage for a car, SEER and HSPF ratings let you compare fuel efficiency of heat pumps - the higher the SEER or HSPF, the better the efficiency. And, you can expect the savings to continue for years because Payne products are designed, built and tested for lasting reliability.

Let Payne Complete Your Comfort

You may not realize this, but heat pumps are two-part systems. There's the outdoor unit that most are familiar with, and there's an indoor component called a fan coil that includes an evaporator coil and a fan or blower. Payne always recommends replacing the fan coil when purchasing a new heat pump because most likely, it is as old as the outdoor unit you are replacing. Replacing the fan coil will ensure the best comfort, the best efficiency and the best reliability in addition to covering your entire system with new product warranties.

Payne is the Right Choice

Payne offers the right products at the right price, offering dependable, comfortable and efficient comfort season after season. So make the decision easy on yourself - choose Payne. When you do, you're choosing a long-standing history of indoor comfort products that are just right for you.

What You Get in a Payne...

- 1 Long-Lasting Fan Motor**
Our high-efficiency fan motor contributes to your comfort by braving Mother Nature's worst for years of durable operation.
- 2 Seamless Comfort**
This heat pump effortlessly switches between heating and cooling operation with the help of its reliable reversing valve.
- 3 Attractive Finish**
The PA13NR looks good today, and will continue to look good for years. The corrosion-resistant finish is pre-painted.
- 4 Compressor Built-to-Last**
Count on years of comfort because the most important component of the entire unit, the compressor, operates quietly and reliably with built-in protective features.
- 5 Smooth, Quiet Operation**
Rubberized isolation pads create a buffer between the base pan and the compressor to minimize noise from vibrations.

Compact Size

The compact size of the PH13NR helps it blend into your landscape. We are able to make this unit smaller without sacrificing performance because of its efficient heat transfer capability.

Low Maintenance

Cleaning or changing the indoor filter regularly will greatly reduce the need for required maintenance of the system.

Enhanced Performance with Payne Indoor Coils

No heat pump system is complete without the fan coil. Payne's Model PF fan coil matches perfectly with any of our heat pumps to deliver quiet, energy-efficient comfort. Our copper tube, aluminum fin coil provides exceptional heat transfer needed for heating and cooling effectiveness and efficiency.

Install Now, Pay Later with Payne Financing

If you're like many people, your need for comfort doesn't always match your immediate ability to pay for it. So Payne makes your life easier with 90 days of no-interest. Pay it off in 90 days, and pay no interest. Or, spread your payments over time with a reasonable finance charge. Either way, you can enjoy comfort now when you need it. Credit provided by GE Capital Consumer Card Company. For more details or to apply for Payne financing, go to www.Payne.com.
