

Air Conditioner – 24ABS3

Turn to the Experts.™

Cool and Efficient Indoor Comfort

Efficiency

Seasonal Energy Efficiency Ratio, or SEER, is like gas mileage. A higher SEER rating means a more energy-efficient air conditioning system. As of mid-January of 2006, the U.S. Department of Energy required home cooling systems to meet a minimum rating of 13.0 SEER. Carrier was one of the first leading air conditioner manufacturers to fully support this environmentally-sound mandate.

The 24ABS3 air conditioner is available with efficiency ratings starting at 13.0 SEER.

As an ENERGY STAR® partner, Carrier Corporation has determined that the 24ABS3 air conditioner that achieves system combinations of 14.5 SEER and 12.0 EER or higher meets ENERGY STAR guidelines for energy efficiency.

Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate coil components to meet ENERGY STAR criteria. Ask your dealer for details or visit www.energystar.gov.

Things to Consider Before You Buy

Comfort

Carrier specializes in creating a customized home comfort system tailored to your needs with our broad selection of heating and cooling products. Your Carrier® dealer can help you choose the best system for your home including Carrier-exclusive features that further enhance your indoor environment. Carrier air conditioners deliver proven comfort in compact sizes.

Reliability

At Carrier, your comfort is our business. That's why we have one of the most extensive product research and development facilities in the world. From initial design to final assembly, we monitor product quality throughout all phases of the process. Our exclusive five-step, 100% run test ensures that every single unit we make exceeds industry expectations and meets the toughest standards of all – yours.

Durability

Neither rain nor hail nor golf or soccer balls can keep a Carrier system from doing its job – it's built tough inside and out.

Outside

WeatherArmor™ protection and galvanized steel cabinet protect against corrosion and keep your system looking its best for years.

Inside

Carrier's compressor design has the most trouble-free performance record of any compressor on the market today.

Greater Operational Efficiency

For every \$100 spent to cool your home using a 10.0 SEER system, a 13.0 SEER system should cost you approximately \$77. Actual savings will depend upon your current efficiency rating versus your newer system efficiency rating.

Operating cost estimate based on a 3-ton system.

Technology

- 1 **Aerodynamic top** – this exclusive design allows air to flow through the unit with less turbulence for improved performance and quiet, efficient operation.
- 2 **Compressor** – the heart of the air conditioner, the compressor pumps refrigerant throughout the system.
- 3 **Copper Microtube™/aluminum fin coil** – transfers heat outside to maximize indoor cooling while resisting corrosion.
- 4 **WeatherArmor™ protection package** – combines design elements that protect your comfort.
 - a. Galvanized steel cabinet
 - b. Wire coil guard protection
- 5 **Filter drier** – constantly filters the refrigerant to remove moisture or contaminants that can damage your system.
- 6 **Corrosion-resistant base** – designed for superior drainage of water and small debris.

Unit shown with optional dense wire coil guard.

Specifications

Limited Warranty

To the original owner, the Carrier® 24ABS3 air conditioner is covered by a five-year parts limited warranty. See warranty certificate at carrier.com for complete details. Ask your Carrier dealer about extended warranties, which may include labor.

Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier® systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
