ENHANCED COMFORT CONTROL THAT KEEPS A LOW PROFILE

PRECISE, RESPONSIVE COMFORT THAT BLENDS WITH YOUR LIFESTYLE.

ENHANCED COMFORT

Carrier puts high performance into an unobtrusive, low profile design. Enjoy the extra comfort and energy efficiency of a seven-day programmable thermostat without disrupting your home's décor. This fully-featured comfort control is as easy to use as it is attractive, with a large continuously lit display and soft, responsive up-and-down buttons. Simply take a few moments to enter your desired heating and cooling levels, then walk away. Your Carrier system will automatically follow a schedule of enhanced indoor comfort and reduced energy usage that matches your lifestyle.

Seven days of programmability with up to four different time/temperature combinations per day allow the ultimate flexibility in comfort scheduling. Your daily schedule can be as routine as clockwork or as unpredictable as the weather. Either way, this thermostat will accommodate your needs. First, work out a schedule of times every day when you want comfort, and times when you can "setback" the temperature to conserve energy. The next step is entering your comfort schedule following the prompts on our easy-to-read LCD display. For your convenience, a copy function allows you to re-enter an entire day's schedule with the single touch of a button. Holiday schedules can easily be overridden to accommodate your ever-changing

SIMPLE TO USE

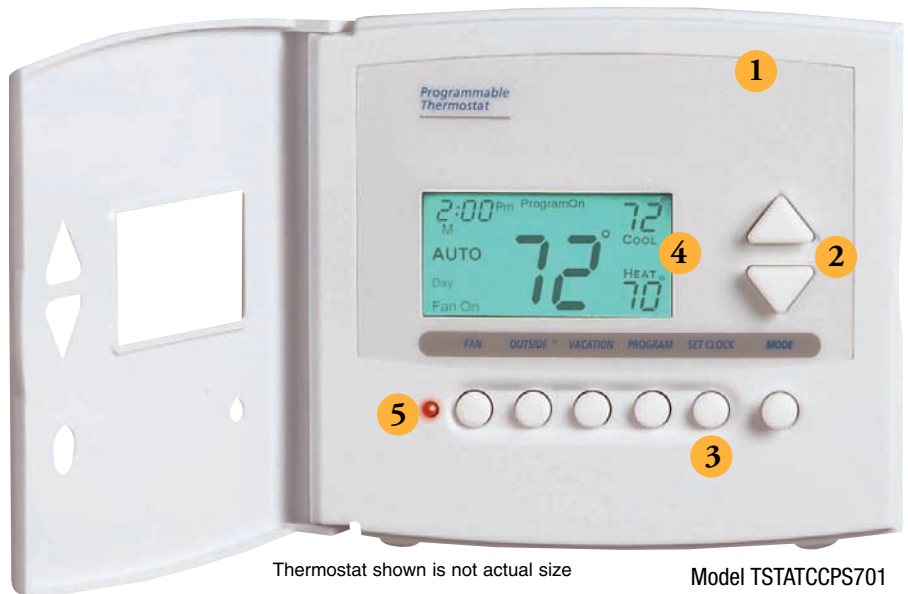

lifestyle.

Easy to read and use, this programmable thermostat is the communication center for your system. The current temperature, along with your programmed heating and cooling levels, are always on display on the continuously lit LCD. You'll always know whether the system is calling for heating or cooling with the two-color LED that glows red during heating mode, green during cooling. And, you'll always know when it's time to change the system's air filter with the convenient service filter indicator. For information on temperatures outside the home, ask your dealer to add the optional outdoor temperature sensor.

This programmable thermostat offers the convenience of seven-day programmability in a slim, unobtrusive design. It's an excellent choice

CONVENIENCE

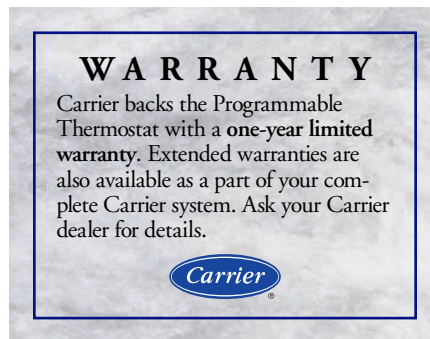

- 1 **Designed to blend with any décor** while maintaining the ease of use you expect from Carrier.
- 2 **Easy to program and operate**, thanks to the large, continuously lit display, responsive push buttons and step-saving copy function.
- 3 **Custom-made comfort with seven-day programmability.** Select up to four different temperature settings per day for maximum comfort and energy efficiency.
- 4 **More consistent temperatures** than standard mechanical thermostats, thanks to all-electronic operation. Battery-free backup stores programmed information indefinitely, even with a total power loss in your home.
- 5 **Relax in comfort all year long** as auto changeover function automatically switches between heating and cooling operation as needed.
