ENHANCED COMFORT CONTROL IN A FLUSH-MOUNT DESIGN

FULLY-FEATURED PROGRAMMABLE THERMOSTAT THE SIZE OF A LIGHT SWITCH.

UNOBTRUSIVE CONTROL

Carrier offers the comfort and efficiency of a programmable thermostat in an ultra-slim package. The secret is our flush-mount design. Instead of being mounted ON your wall, this programmable thermostat is mounted IN your wall, with a faceplate that extends just 3/8 of an inch from the surface. This design puts seven days of programmable comfort at your fingertips in a unit that takes up about as much space as a typical light switch or electrical outlet.

Seven-day programmability with up to four time periods per day allows you to create a schedule that enhances comfort and saves energy. Before you begin programming, map out a comfort schedule that follows your lifestyle. Select temperatures for comfort when you are home, and "setback" temperatures for energy conservation when you are typically asleep or away. Then, following the prompts on the large LCD display, enter your schedule using the responsive push buttons and the step-saving copy function. Your system will do the rest so you can relax and enjoy the money-saving comfort.

CONVENIENT COMFORT

User-friendly features and easy-to-read system monitoring make system control easy and convenient. The large, continuously lit display is easy to read in low lighting conditions, showing the current temperature as well as the programmed heating and cooling set points. Our two-color LED indicator lets you monitor operation by turning red during heating mode or green when the system calls for cooling. Fully electronic operation helps minimize the up-and-down temperature swings of older thermostats. And the holiday function can bypass your regular schedule with the single push of a button—no need to reprogram for vacations.

Offering convenient, precise and unobtrusive comfort control, this programmable thermostat is an excellent enhancement for your Carrier indoor comfort system.

EASE-OF-USE

- 1 **Designed to blend with any décor** without sacrificing performance. Flush-mount design has a faceplate that extends just 3/8 of an inch from the surface of the wall.
- 2 **Easy to program and operate**, thanks to the large, continuously lit display, responsive push buttons and step-saving copy function.
- 3 **Custom made comfort with seven-day programmability.** Select up to four different temperature settings per day for maximum comfort and energy efficiency.
- 4 **More consistent temperatures** than standard mechanical thermostats, thanks to all-electronic operation.
- 5 **Relax in comfort all year long** as auto changeover function automatically switches between heating and cooling operation as needed.
