

STANDARD PROGRAMMABLE THERMOSTAT

Thermostat shown is not actual size

BASIC CUSTOMIZED COMFORT CONTROL

ENERGY-SAVING PROGRAMMABILITY WITH A COMPACT FOOTPRINT.

COMPACT DESIGN

Presenting Carrier's smallest programmable thermostat, offering the ability to create one comfort schedule for the week, and a separate schedule for the weekend. It's an excellent upgrade from an older, mercury-based thermostat or a great way to enhance your system with basic, two-day programmability. No matter why you choose this model, you'll enjoy the convenience, economy and comfort control it can provide as a part of your Carrier indoor weather system.

With up to four time periods for each programmable day, you can create a schedule that enhances comfort and saves electricity. Before you begin programming, map out two comfort schedules: one for weekdays and one for the weekend. Choose temperatures for comfort during the times you are typically home, and "setback" temperatures for times you are typically away or sleeping. Then, follow the simple programming commands on the LCD display to enter your schedule using the responsive push buttons. Once programmed, this standard programmable thermostat will take control of your comfort. Enjoy the convenience of automatic comfort

CONVENIENCE

control and temperature information at a glance. Auto changeover means your thermostat will automatically tell the system to switch between heating and cooling operation. It's easy to see your current temperature and your desired heating and cooling temperatures on the large, continuously lit LCD display. Electronic operation means no batteries to replace and a non-volatile memory means you'll never lose programmed information. In addition, 5-minute compressor protection and adjustable cycle limits help maintain reliable system operation.

Compact, programmable and simple to use, Carrier packs performance plus convenience in a standard programmable thermostat designed to enhance the capabilities of your indoor weather system.

EASE OF USE

- 1 Compact design** takes up very little space on your wall.
- 2 Easy to program and operate**, thanks to the large continuously lit display and responsive push buttons.
- 3 Custom made comfort with two-day programmability.** Select up to four different temperature settings for each day, with one schedule for the week and a second schedule for the weekend.
- 4 More consistent temperatures** than standard mechanical thermostats, thanks to all-electronic operation.
- 5 Relax in comfort all year long** as auto changeover function automatically switches between heating and cooling operation as needed.

Model TSTATCCPB501
