

STANDARD PROGRAMMABLE
Thermostats

CONVENIENT, ENERGY-SAVING INDOOR WEATHER CONTROL

Control your custom made indoor weather.

convenience

The Standard Programmable Thermostat from Carrier provides customized comfort. With four periods per day and two schedules per week, this thermostat allows you to set one heat/cool range for weekdays and another for weekends. Programming the thermostat in this way provides customized comfort and helps you save energy by scheduling heat/cool operation for those times when you are actually at home to enjoy it. Best of all, setting the temperatures and times is fast and easy with a large LCD display and simple push buttons, so you can program and re-program to suit your active lifestyle.

responsive

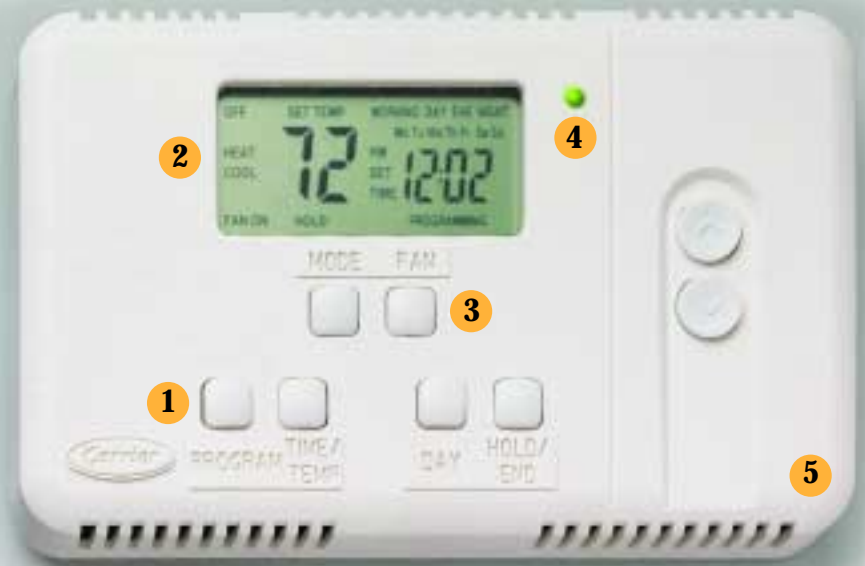

This thermostat is designed and engineered for today's home comfort systems. From the 4-wire installation with terminal blocks on the backplate, to the intuitive LCD display and push button programming, to the delivery of indoor comfort when you need it, this thermostat is made for responsive performance. And it doesn't stop there. Carrier has responded to the demands of interior designers and homeowners by artfully blending the Standard Programmable Thermostat with your home décor. Comfort control never looked so good!

responsible

Mercury-free, battery-free electronic comfort control is friendly to our environment. The Standard Programmable Thermostat contains absolutely no potentially hazardous mercury, and does not use batteries. It's 100% electronic, so it won't lose memory or need to be reprogrammed after power outages. You'll also be glad to know the thermostat is EPA Energy Star approved and meets California Title 24 requirements. So, in addition to feeling the benefits of dependable, controllable indoor weather, you'll find great comfort in knowing that you and Carrier are being environmentally responsible.

features

- 1 Programming ease and flexibility** makes it possible to divide the day into four periods and create two separate schedules (5-2 day programming), one for weekdays and one for the weekends.
- 2 Easy to read LCD display** takes the guesswork out of set-up and operation. The display shows MODE setting, FAN setting, room temperature and current time, as well as any ERROR messages.
- 3 Soft rubber push buttons** give you fingertip control of MODE, FAN, PROGRAM, TIME/TEMP, DAY, HOLD/END, and temperature UP and DOWN.
- 4 Auxiliary heat indicator** is a green LED which lets you know when operation shifts to backup or emergency heating in heat pump applications.
- 5 Attractive design** helps blend this thermostat with the home décor found in most new construction and replacement installations.
- 6 Electronic operation without batteries** provides greater reliability without the need to re-set temperatures after a power outage.

The Standard Programmable Thermostat provides convenient, flexible, energy-saving comfort control to any home equipped with a Carrier system.

6 Battery-free operation
Even in the event of a power outage, program settings are stored indefinitely.

WARRANTY

Carrier guarantees your indoor weather with written product warranties. This thermostat is covered by a one-year limited warranty. Extended warranties are also available. Ask your indoor weather expert for details.
