

PROGRAMMABLE

# Thermidistat™ Control

LIGHT COMMERCIAL ACCESSORY FOR 3 – 12.5 TON ROOFTOPS UNITS

TEMPERATURE AND HUMIDITY CONTROL FOR ENHANCED INDOOR WEATHER

# Carrier puts superior comfort control at your fingertips.

enhanced indoor weather

Most people don't realize that the key to superior indoor weather includes controlling both temperature and humidity. Carrier understands this concept, and responds to the need for enhanced indoor weather by offering our Thermidistat™ Control designed specifically for use in light commercial applications. This unique controller combines the functions of our programmable thermostat and our humidistat, putting unparalleled comfort control at your fingertips. And, it's ideal for use with Carrier's MoistureMiser™ accessory for even greater humidity control all year long.

Carrier's Thermidistat Control follows your desired comfort schedule to deliver the temperature you want while minimizing the effects of dry, winter air and relieving the discomfort of summer humidity. Programming is simple and intuitive with the same easy-to-read display as our popular thermostats. Just take a few minutes to program your desired temperature and humidity settings, then relax and let Carrier provide the custom made indoor weather you deserve.

simplicity

Carrier's Thermidistat Control incorporates a wide range of functions for simple programming and operation while offering a wide range of features for maximum indoor weather control. As you program the Thermidistat Control, you'll appreciate the time savings and convenience of our "copy previous day" function. Two occupied periods and two unoccupied periods

allow flexibility to set your schedule for comfort when your building is occupied and greater economy when your building is unoccupied. Auto Changeover allows the system to automatically switch between heating and cooling operation as needed to more precisely follow your desired comfort schedule. And, Holiday mode allows you to switch from your normal schedule to comfort settings that make sense during extended absences with the single touch of a button.

features & functions

**One control** gives you complete command of indoor temperature and humidity levels.

**Automatic humidity control** is an option that lets your system automatically adjust indoor humidity based on current outdoor conditions. This function minimizes condensation build-up on your windows. Even greater humidity control is available with Carrier's MoistureMiser™ accessory.

**Holiday mode** provides a one-button method for switching between your everyday comfort schedule and a schedule that makes more sense during periods of extended absence from your building.

**Indoor humidity display** allows you to monitor the relative indoor humidity.

**7-day programmability** allows you to customize a comfort schedule that makes sense for you. Two occupied and two unoccupied periods provide even greater flexibility for maximum comfort and economy.

**Auto changeover** automatically switches between heating and cooling operation on days when both heating and cooling are necessary.

**Smart Recovery** helps your system deliver the temperature you want at the time you expect. Heating or cooling operation starts before a scheduled temperature change to gradually achieve the comfort level you have selected.

**Clean filter indicator** reminds you when it's time to clean or replace your system's air filter.

**Copy previous day function** makes programming faster and easier.

**Large push buttons** respond quickly to your touch and are easy to work with.

**Easy-to-read LCD display** lights up for accurate readings at a glance, even under low-light conditions.

## WARRANTY

Carrier guarantees your indoor weather with written product warranties. The Light Commercial Thermidistat Control is protected by a **one-year limited warranty**. Ask your local indoor weather expert for details on our extended warranties.
