

Comfort™ 10 Air Conditioner and Comfort™ 10 Heat Pump

Turn to the Experts.™

Comfort™
SERIES

Delivering Proven Comfort and Value

Efficiency

Seasonal Energy Efficiency Ratio or SEER number and Heating Seasonal Performance Factor or HSPF are like gas mileage. The higher the rating, the more efficient the automobile or system is.

- Carrier's Comfort™ 10 air conditioner is available with an efficiency rating from 10.0 SEER.
- The Comfort™ 10 heat pump has efficiency ratings from 10.0 SEER and 7.0 HSPF.

Things to Consider Before You Buy

Comfort

Carrier specializes in creating a customized home comfort system tailored to your needs with our broad selection of residential heating and cooling products. Your Carrier dealer can help you choose the best system for your home including Carrier-exclusive features that further enhance your indoor environment. Carrier's Comfort™ 10 air conditioner and heat pump deliver proven reliability and comfort.

- Add a variable speed furnace or fan coil and Thermostat™ Control to your Comfort™ Series heat pump and receive Carrier's exclusive ComfortHeat™ Heat Pump System. The result is more consistent temperature, greater air circulation and improved air quality. This system can deliver warmer air by up to 20 degrees while in the heating mode.
- Bothered by that dry, stinky feeling in the winter or that muggy feeling in the summer? IdealHumidity™ monitors and adjusts your home's humidity

level even when the system isn't actively heating or cooling. By keeping the proper balance of moisture in your home, you remain more comfortable at higher temperatures in the summer and lower temperatures in the winter. Add a Carrier humidifier, variable speed furnace or fan coil and Thermostat™ Control to achieve IdealHumidity™ in your home.

IdealHumidity

Durability

Neither rain nor hail nor golf or soccer balls can keep a Carrier system from doing its job – they're built tough inside and out.

Outside

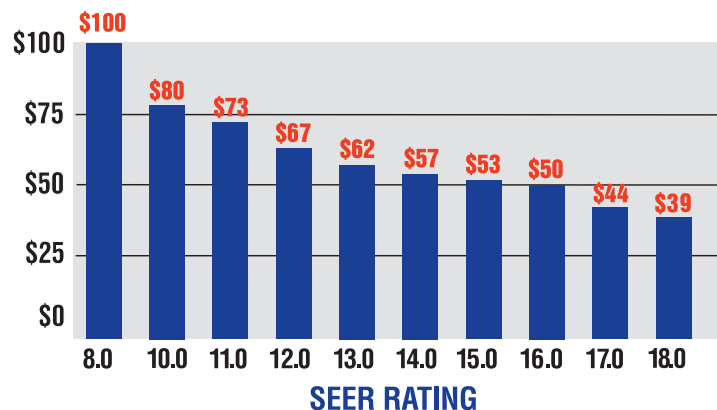

- WeatherArmor™ III protection keeps your system looking and operating its best for years to come.

Inside

- Carrier's compressor design has the most trouble-free performance record of any compressor on the market today. An extra-thick shell protects the life of the compressor for excellent reliability.

Greater Operational Efficiency

For every \$100 you spend using an 8.0 SEER heat pump system, a 10.0 SEER system should cost about \$80. Actual savings will depend on the efficiency of your current system compared to the efficiency of a new system.

Technology

Comfort™ 10 Air Conditioner

- 1 Compressor** – as the heart of the cooling system, the compressor provides reliable, quiet, high-efficiency comfort.
- 2 High- and low-pressure switches** – protect the system from damage by shutting off if harmful conditions are detected.
- 3 WeatherArmor™ III protection package** – combines three design elements that protect your comfort.
 - a. Galvanized steel cabinet
 - b. Heavy-duty wire grille
 - c. Ceramic-coated screws

Warranty

The Comfort™ 10 air conditioner and Comfort™ 10 heat pump are protected by a 10-year limited warranty on the compressor and a five-year limited warranty on the entire unit. Extended warranties are also available. Ask your Carrier dealer for details.

Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
