

CARRIER OFFERS A CENTURY OF EXPERIENCE FOR YOUR PEACE OF MIND.

CARRIER SYSTEMS

Humidifier

As part of a total indoor system, a Carrier humidifier replenishes moisture to dry, indoor air.

Evaporator Coil

A Carrier evaporator coil is matched with the proper outdoor unit to provide top cooling efficiency and years of reliable service. If replacing your outdoor unit, Carrier recommends replacement of the evaporator coil as well to achieve published SEER ratings and ensure peak performance and reliability.

Furnace

Carrier offers a complete line of top-quality, high-efficiency gas and oil furnaces. Your local Carrier dealer can recommend the furnace that is right for you.

Air Cleaner

Carrier air cleaners can substantially improve your indoor air quality by removing harmful and irritating airborne pollutants from your home.

Air Conditioner

A complete line of Carrier air conditioners provides reliable, high-efficiency cooling for long-lasting comfort and energy savings. Ask your dealer about environmentally sound Carrier air conditioners with Puron® refrigerant.

Ultraviolet Germicidal Light

reduces the amount of pollutants, such as mold, bacteria, fungi and viruses, leaving your home with cleaner, fresher indoor air.

Zoning

Comfort zoning allows you to set different temperatures for different areas of your home. Enjoy greater comfort and added energy savings with room-to-room temperature control.

Comfort Ventilator

A Carrier comfort ventilator adds a breath of fresh air to today's tightly constructed home. It combines fresh outdoor air with conditioned indoor air for improved air and energy exchanges.

Thermostat™ Control

A Carrier Thermostat™ Control is your command center. Precise temperature control and programmable features keep you in touch with your comfort.

MATCHING COMPONENTS PROVIDE OPTIMUM COMFORT, EFFICIENCY AND PERFORMANCE

- Forced-air systems are usually built around an indoor unit, such as a furnace or a fan coil.
- The outdoor unit will be an air conditioner or a heat pump combined with a furnace for year-round comfort.
- Air quality is greatly improved with the addition of an air cleaner, humidifier and a ventilator.
- Precise temperature control comes from a Carrier thermostat matched to your indoor system.
- Zoning provides the ultimate in control over your indoor system.

WEATHERMAKER® 8000 – 58DLA/58DLX GAS FURNACE

EXPERTISE

Carrier has been on the leading edge of the indoor comfort industry since Willis Carrier invented what we now know as air conditioning in 1902. Since that time, Carrier scientists, engineers and dealers have been providing homeowners with the most advanced indoor comfort

technology available. This technological advantage has enabled Carrier to create indoor systems that match the varying needs of millions of homeowners nationwide.

Today, you can rely on your local Carrier dealer to evaluate your indoor comfort needs and suggest a system that fits those precise needs.

By recommending the appropriate furnace, air conditioner, humidifier, air cleaner, ventilator, zoning system and control, your Carrier dealer can offer enhanced comfort while improving the efficiency of your system. Ask your local dealer for a system evaluation today.

RELAX WITH QUIET, RELIABLE COMFORT

GET COMFORTABLE WITH HEATING YOU CAN DEPEND ON, FROM CARRIER.

VALUE

When you retreat to your home this winter, you deserve to enjoy the quiet, reliable heating provided by the Carrier WeatherMaker® 8000.

It's hard to predict exactly how winter is going to hit, so it's nice to know your comfort is taken care of. That's the value of the WeatherMaker 8000. The newest generation of a time-tested family of gas furnaces, this model offers the rock-solid reliability that comes with experience. You'll also appreciate the extra-quiet operation that makes relaxing around the house so enjoyable. Offering an extremely versatile and compact design for the most challenging installations, the WeatherMaker 8000 is a dependable fit for your winter comfort needs.

EXTRA QUIET

With the WeatherMaker 8000, we've taken a great product and made it even better through a new design that makes this one of the quietest 80% AFUE (Annual Fuel Utilization Efficiency) furnaces available.* To achieve such low noise operation, our engineers went back to the drawing board and made improvements in several areas, including the burner, the inducer and the fan. We call it our QuietTech™ system, and we think you'll call it a welcome addition to your home.

Be sure to ask your Carrier dealer about products that use Puron, the new environmentally sound refrigerant.

INNOVATION

Carrier has always made an effort to offer features and functions no other manufacturer offers, and that's reflected in the WeatherMaker 8000.

Two comfort benefits you'll find exclusively from Carrier and available with this furnace include ComfortFan™ and SmartEvap™. ComfortFan helps improve comfort all year long without changing temperature settings by giving you control over continuous fan speed. It's a great function to use during unusually large household gatherings, changing weather conditions or any time you can improve comfort by increasing or decreasing airflow during continuous fan operation.

For improved humidity control in the summer months, add our optional Thermidistat™ Control to enable

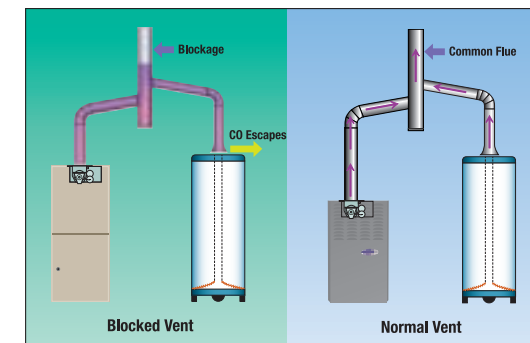

A Carrier Thermidistat™ Control or one of our programmable or standard thermostats can maximize the performance of your indoor system. Ask your dealer for details on which will work best with your system.

SmartEvap. SmartEvap helps your system reduce humidity levels by up to 10% by adjusting fan operation, to prevent moisture from re-entering your home. This function leaves indoor air drier and more comfortable during cooling operation.

FIT & FINISH

The WeatherMaker® 8000 is our most versatile cabinet design to date, offering installation flexibility that meets unique challenges. Our patented heat exchanger is more compact, allowing us to make the cabinet height several inches shorter for a better fit in tight spaces. At the same time, you'll still enjoy the energy efficient heating you expect from Carrier. And, the cabinet design allows for installation in all four standard positions with thirteen possible venting setups, making installation easier in every situation imaginable.

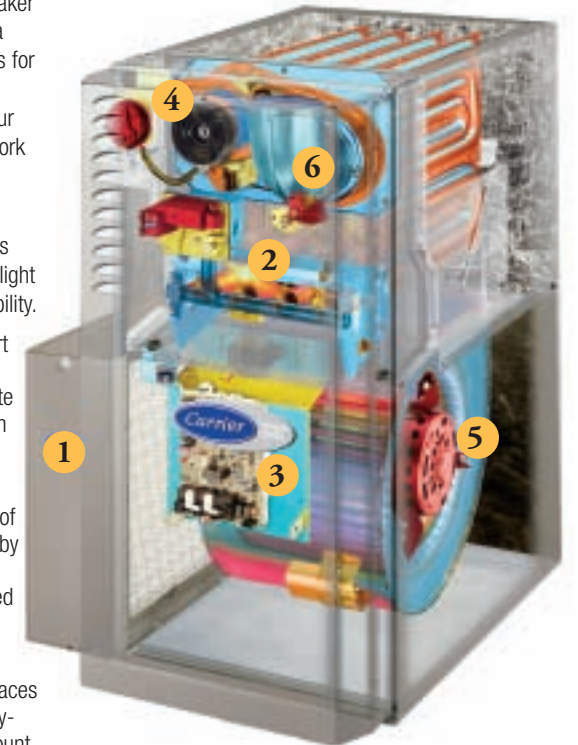

With the WeatherMaker 8000, you'll benefit from what we've changed, as well as what we haven't changed: quality. Offering a century's worth of experience in design modifications, we've learned how to improve performance without sacrificing quality. That's why every product we create benefits from the most extensive quality testing in the industry. It begins with the initial design, continues with hand-built prototype units, and we follow through with assembly line checks and final assembly run tests. Once we're satisfied, we believe that you'll be satisfied with your decision to select Carrier for your indoor heating needs.

Carrier offers our exclusive draft safeguard switch for enhanced safety and reliability. It's quite common to have your furnace and hot water heater sharing a common vent. Draft safeguard automatically shuts down furnace operation if this common vent becomes blocked, preventing harmful flue gases from entering your living space.

TECHNOLOGY

- Enhanced indoor air quality** is made easier with our media filter cabinet, an optional accessory with the WeatherMaker 8000 gas furnace. When installed as a part of your system, this cabinet allows for the easy and convenient addition of a Carrier high-efficiency air filter. Ask your dealer if the media filter cabinet will work with your specific application.
- Efficient, dependable startup** is the result of using hot surface ignition. This feature eliminates the need for a pilot light to help save gas while improving reliability.
- Improved control** over indoor comfort can be attributed to our sophisticated electronic control board. This solid-state component manages furnace operation and comfort functions such as ComfortFan™ and continuous fan.
- Economical gas usage** is the result of precise airflow management provided by the inducer fan assembly. Inducer fan draws the precise amount of air needed for maximum heat exchanger performance.
- Dependable airflow** in your living spaces comes from our blower. With its energy-efficient, direct drive motor, you can count on effective delivery of heated air throughout your home.
- Extra-safe operation** comes from our exclusive blocked vent safeguard function. Blocked vent safeguard shuts down furnace operation if a common vent is obstructed. This function protects your family against the potential of harmful flue gases escaping into your living area.

WARRANTY

Carrier takes pride in offering the best indoor comfort equipment available. We also take pride in offering a **twenty-year limited warranty** on the heat exchanger, and a **five-year parts limited warranty** on the entire unit. Ask your Carrier dealer for details on our extended warranty programs as well.
