Carrier Receives ASHRAE Innovation Awards for Green Building, Cooling, Indoor Air Quality

NEW YORK – Feb. 4, 2008 – Carrier Corp., a unit of United Technologies Corp. (NYSE:UTX), was honored with three ASHRAE (American Society of Heating, Refrigerating and Air-Conditioning Engineers) Innovation Awards in New York City during the recent AHR (Air conditioning, Heating and Refrigerating) Expo. Carrier’s Evergreen® 23XRV with Foxfire™ compression technology won in the category of “Green Building.” AquaForce® air-cooled chillers received honorable mention for the Cooling Award and the Aero™ 39M air handler with Agion™ technology also received an honorable mention for the Indoor Air Quality Award.

“We are very proud to receive recognition for advances in product innovation,” said Kelly Romano, president, Building Systems and Services, who accepted the awards on behalf of Carrier Corp. “We consider energy efficiency and environmental concerns in all of our products, from concept and design to operation. We are dedicated to producing and promoting innovative technologies that achieve environmental stewardship and superior energy efficiency.”

The Evergreen 23XRV with Foxfire compression technology uses HFC-134a refrigerant and extends the Evergreen® Series water-cooled chiller line. The product

employs new technology to achieve world-class energy efficiency with zero compromise on ozone protection. The Evergreen 23XRV's variable speed screw compressor gives product owners the flexibility to reduce their facility's energy load when in limited use. It has part-load energy efficiency ratings as high as 0.33 kw/ton and the lowest life-cycle costs of any water-cooled chiller in the industry.
