**Carrier Corp. Offers Special Seismic Compliant Package for Chillers and Rooftops**

SYRACUSE, N.Y., Jan. 31, 2011 — Carrier now offers a special seismic compliant package in accordance with the California Office of Statewide Health and Planning Development (OSHPD) for select water- and air-cooled chillers and rooftops. This option is available for these Carrier® products: AquaSnap® 30RB air-cooled chiller, Evergreen® 23XRV and 19XRV water-cooled chillers, AquaForce® 30XW water-cooled chiller, and Centurion® rooftops. Carrier Corp., a unit of United Technologies Corp. (NYSE:UTX), is the world's leader in high technology heating, air-conditioning and refrigeration solutions, improving the world around us through engineered innovation and environmental stewardship.

“Hospitals, schools, government buildings, emergency shelters, and other public places across the country are being required to comply with special seismic requirements,” stated Charlie Figueroa, vice president and general manager, commercial applied products, Carrier Residential and Commercial Systems. “The seismic requirement not only includes the building, but also the equipment. With our customer-focused optional package, building owners and consultants can be assured that Carrier equipment was certified by an independent third party for seismic events.”

Carrier equipment with the optional, installed seismic package meets International Building Code, California Building Code and ASCE 7 seismic qualification requirements in concurrence with ICC ES AC156 Acceptance Criteria for Seismic Qualification by Shake Table Testing of Nonstructural Components and Systems.

For further information and documentation on Carrier seismic compliant products go to [www.carrier.com](http://www.carrier.com).
