HAP for LEED® Certification Training

Date: November 18, 2009

This intense 1 day class presented by Carrier Software Systems focuses on the **LEED® EA credit 1**, Optimized Energy Performance. Advanced HAP techniques are applied to Whole Building Energy Simulation and ASHRAE/IESNA Standard 90.1-2004 and 2007 requirements. Training covers in-depth, hands-on application of baseline and proposed building energy analysis and includes development of creative HVAC system alternatives for more LEED-NC/LEED-Building Design & Construction points.

Prerequisite: Prior knowledge of HAP load estimating and energy simulation is helpful but not mandatory, LEED-NC EAc1 and ASHRAE 90.1 Appendix G familiarity is recommended.

Schedule: 8:30 a.m. to 5:00 p.m.

Course No: SSN0005

Tuition: \$300.00 US/\$350 CDN

What's Provided?

Students are expected to bring their own laptop computers. Please ensure HAP v4.4 is loaded on your laptop before the class begins. For students who do not currently have HAP installed, a 90-day demo is available if needed. If unable to bring a laptop to training, please contact Software Systems. Lunch, student workbook and CD are included as well.

Discount Pricing

Discount must be taken at time of original payment. Send three or more students from the same company to the same class, receive a 25% discount off of the regular tuition when one student pays full tuition.

Registration is required. [Click here](#) to visit Carrier's website for registration form.
