HAP for LEED® Certification Training — [CLICK HERE TO REGISTER](#)

Date: 24 March 2010

This intense 1 day class presented by Carrier Software Systems focuses on the **LEED® EA credit 1**, Optimized Energy Performance. Advanced HAP techniques are applied to Whole Building Energy Simulation and ASHRAE/IESNA Standard 90.1-2004 and 2007 requirements. Training covers in-depth, hands-on application of baseline and proposed building energy analysis and includes development of creative HVAC system alternatives for more LEED-NC/LEED-Building Design & Construction points.

Prerequisite: Prior knowledge of HAP load estimating and energy simulation is helpful but not mandatory, LEED-NC EAc1 and ASHRAE 90.1 Appendix G familiarity is recommended.

Schedule: 8:30 a.m. to 5:00 p.m.

Course No: SSN0005

Tuition: \$300.00 US

What's Provided?

Students are expected to bring their own laptop computers. Please ensure HAP v4.4 is loaded on your laptop before the class begins. For students who do not currently have HAP installed, a 90-day demo is available if needed. If unable to bring a laptop to training, please contact Software Systems. Breakfast, lunch, student workbook and CD are included as well.

Discount Pricing

Multiple Student—Register two or more students from the same company, on the same registration form, and each will receive a discount of 10% off regular tuition.

Registration is required. Please click the appropriate link above to register for the desired class.
