

X Builder Framework v1.03n replaces v1.03m

PROGRAM DESCRIPTION

X Builder Framework is the underlying software which serves as the “framework” tying all Electronic Catalog and E20-II programs together. It can also be used as a central launch portal for all Electronic Catalog Product Builders. The software appears as "Carrier Electronic Catalog" on the Start/Programs Menu.

X Builder Framework v1.03n resolves the following issues:

- When running in SI Metric units, if a numeric value was entered in the Programs / Options dialog, the value was rounded to the nearest whole number as measured in English Units.
- If a specific Microsoft Security Update had been installed on a computer, individual E-CAT Builders could not be launched from the Windows Start/Programs Menu or from the Programs tab within E-CAT. In addition, the Products and Reports tabs in E-CAT could not be used.
- When a Builder returned from a select-by-performance calculation, the tag was not displayed in the Configurator in the right hand pane. Instead the Equipment Tag Summary was displayed.

Please refer to the X Builder Support Notes in the Software/Program Downloads section of the web site, or from Carrier Electronic Catalog’s “Welcome” screen for more information.

INSTALLATION PROCEDURES

Installation via Internet Download

- Download the **ecat-xbf103n.exe** file from the internet site and save it in a folder on your hard disk.
- Close any other programs running on your desktop computer.
- Run Windows Explorer and double-click on the **ecat-xbf103n.exe** file. This launches the program installer.
- Follow the installation instructions, which appear on your screen. After installation you may be asked to reboot.

Running the Program

- From the Windows desktop press Start, choose Programs and then choose Carrier E-CAT/E20-II programs.
- In the Carrier E-CAT/E20-II Programs group click on the Carrier Electronic Catalog v1.03n icon.

Minimum Computer Requirements:

- Hard Disk Space: 30 megabytes.
- Random Access Memory: 128 megabytes minimum, 256 megabytes recommended.
- Display Monitor: At least VGA with 600x800 resolution and 256 colors.
- Operating System: Windows 98, 2000, XP, Vista or Windows NT (with service pack 4 or later)

PREVIOUS VERSION INFORMATION

1. X Builder Framework includes prior versions of E-CAT/E20 Configuration Services.
2. Projects and Tags created with E-CAT/E20-II Configuration Services will continue to work as normal within their specific selection programs. Additionally, all projects created with 32-bit version of E-CAT programs will be available in the Project Tool within X Builder.

SPECIAL NOTES

1. **Adobe Acrobat, AutoDesk VoloView.** Certain X Builder Framework components depend on Adobe Acrobat Reader and Autodesk Voloview drawing viewer. These components are included in the CD installs, but may need to be downloaded and installed separately if you are installing from the internet and your computer does not yet contain this software.
